BSI: Your testing and certification partner for excellence.

Testing and certification for fire protection, suppression and installation systems.

bsi.

...making excellence a habit.™

Introduction

At BSI we have a full range of testing and certification services to enable you to bring your products to market effectively. We are independent of all product suppliers, installers and manufacturers, so we can guarantee a confidential and impartial service, and provide you with reliable objective guidance.

Use BSI to help you independently demonstrate compliance of your new and innovative products or services. Gain CE marking and BSI Kitemark as your passports to new markets and opportunities.
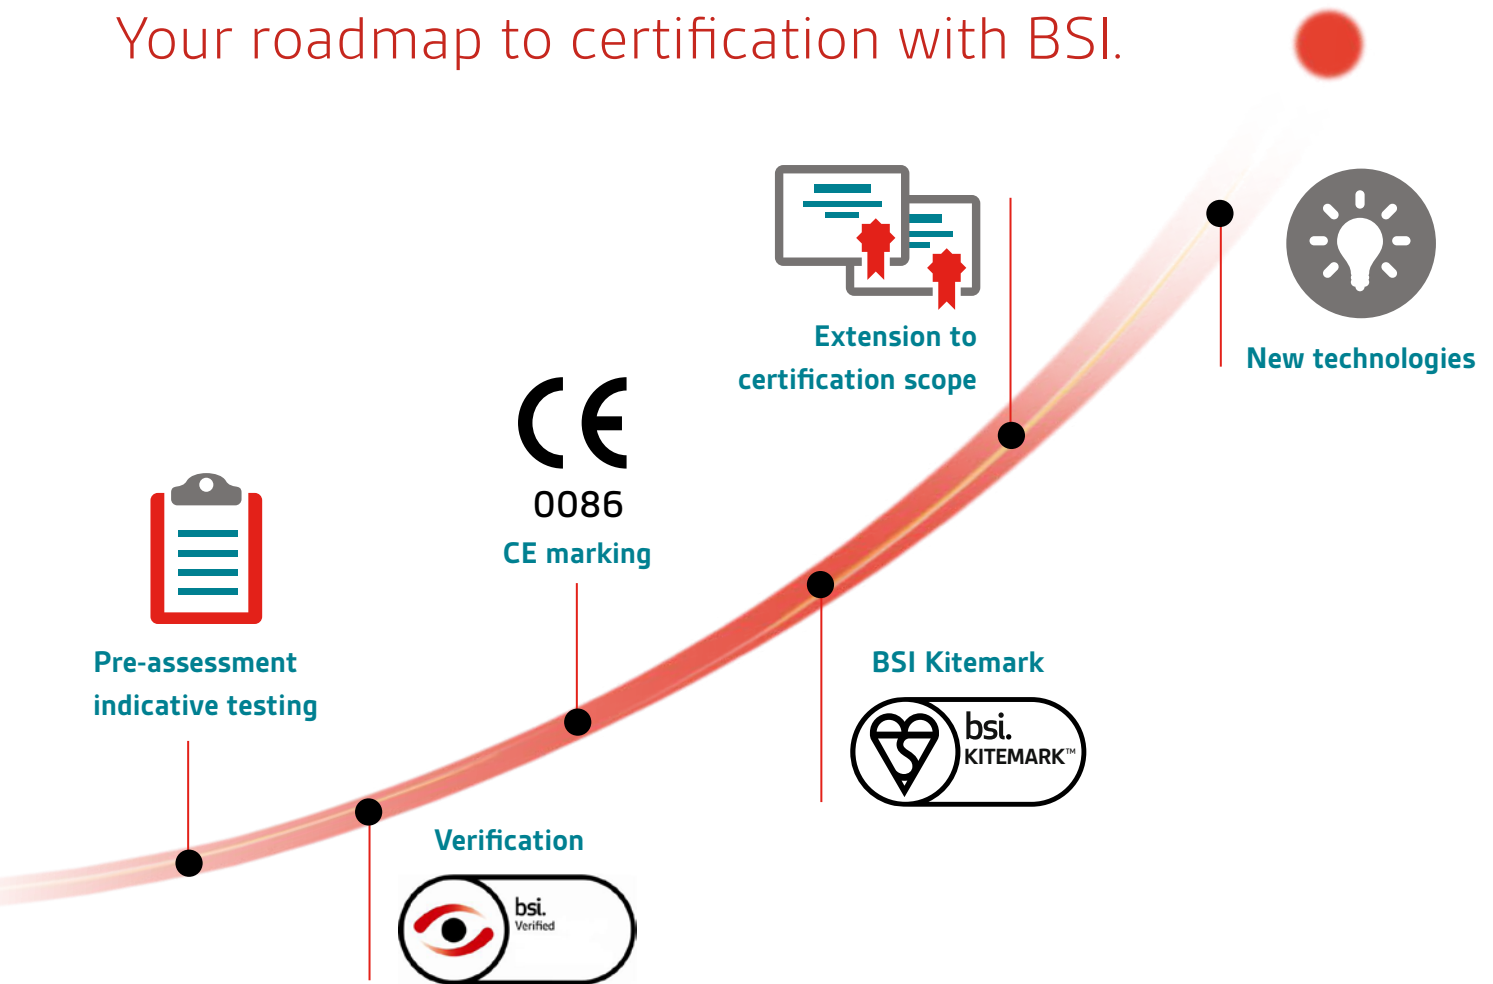

We have been testing fire products since 1960. As a **UKAS Accredited Certification Body,** we have the expertise and integrity to independently endorse your product development, your credentials and your brand. Plus with our Notified Body status for specific Directives and Regulations, we're committed to helping you meet and demonstrate compliance to the relevant standards and legislation. We focus on delivering a testing and certification partnership underpinned by quality, safety, reliability and accuracy aligned to your product development requirements.

Where are you on your journey?

We have a full suite of testing services for you to choose from, to help you get your products to market. Plus if you are developing new products, talking to our experts early in the development process can help you realise the full potential and commercial advantage of certification, with significant efficiencies and increased profits to be gained for your business. And with our global reach – with partner laboratories in the UK, China, Middle East and Turkey for example, we can support your business locally.

Your roadmap to certification with BSI.

KITEMARK™

Pre-assessment indicative testing

Verification

bsi.
Verified

Our services include:

Pre-assessment/indicative testing

We can help support your product development process to test your innovation as a more cost effective solution before you apply for third-party certification. Any non-conformities can be identified at an early stage, reducing the need for re-testing during a formal compliance test.

Your commercial advantage:
Get your products to market more quickly. Investment at this stage could help you steal a march on your competitors.

Verification

bsi.
Verified

If you have self-declared your products in order to meet specific regulations or directives, you'll have your own test data, technical files and test reports. Or if no standard exists in the marketplace, you may have your own test data or evidence that your product has been assessed to a certain requirement. If you're looking for additional verification of that data, we can help. We can review all your technical information, carry out further tests if appropriate and issue a Verification Certificate to you.

Your commercial advantage:
Self-declaration supported by BSI Verification can offer your customers increased levels of confidence in your products. We'll give you the independent overview in specific technical areas, and you'll be able to use verification to support procurement specifications.

CE marking

If you want to trade within the European Economic Area (EEA) and your products fall within the scope of a Directive or Regulation, they must meet the essential characteristics of the Directive or Regulation and you must make a declaration of conformity. CE marking has to be in place from launch. By CE marking you can offer customers a measure of reassurance about the quality and safety of your products.

As a Notified Body (Number 0086) we have the expertise to help you understand what your responsibilities are, and will provide the third-party evidence you need to be able to affix CE marking to your products.

Your commercial advantage:

If the European market is your destination, the CE mark is your route to sales and opportunities.

BSI Kitemark™

BSI Kitemark has been in existence since 1903. We're proud to own it. It's unique to BSI and has helped to address safety, quality and security issues for thousands of products.

Rigorous testing to national or international standards, on-going sample testing to avoid any slippage of manufacturing quality or product performance, and annual assessments of factory production controls all combine to give truly robust, independent, voluntary third-party certification with a BSI Kitemark.

If you choose to implement ISO 9001, the international management system for quality to help control your factory production, we can offer you certification against this management system too.

Your commercial advantage:

The BSI Kitemark is a powerful marketing tool which works around the world as a global passport to help you gain access to new markets.

75% of clients say BSI Kitemark helps them attract new customers

65% confirm BSI Kitemark helps to increase sales

Plus you can offer your customers additional peace of mind. Direct future clients to your full range of BSI Kitemark approved products, listed in our online Kitemark directory to give additional reassurance.

Extending the scope of your certificates

If something has changed which needs to be reflected on your certificate, we can help. From a new location to a new product or modification, we can help you make sure your products still comply, and your certificate is still valid.

New technologies

Where new or adapted products are ahead of the curve, a relevant standard may not yet be available. We can still help. We can often use other specifications or technical documents, such as trade association specifications or what are known as publically available specifications (PAS's). As long as they are robust, developed by consensus and publically available, we can run a valid certification scheme to them. We are also, where appropriate, able to combine clauses from specific standards in order to be able to offer third-party certification.

Your commercial advantage:

You could be first to market, gaining a significant competitive edge. Combining this with a BSI Kitemark could significantly boost confidence in your products.

Our facilities

We offer a comprehensive range of testing and certification for over 90 different standards for BSI Kitemark, CE marking and BAFE, including on-site witness testing and integrated multi-assessments.

At our Centre of Excellence, we have facilities to undertake a wide range of testing on fire suppression equipment at our Hemel Hempstead Laboratories and have off-site facilities for fire testing. Our labs have a comprehensive range of equipment for testing fire detection panels, power supplies, detectors or various types, call points, sounders, visual alarm devices and line units. Our engineers can visit manufacturers premises or other independent laboratories to undertake work where this is convenient and suitable.

Clients are welcome to view the testing of their products, to meet with our technical engineers and experience testing first-hand to share with colleagues and technical teams. Plus if you wish to film the testing of your products for promotional or technical purposes, we are happy for you to choose this option*.

Our fire testing portfolio

Fire Suppression

Fire Brigade Equipment

Fire Hoses

- Construction Products Regulation
- BSI Kitemark

Fire Hydrants, Landing Valves, Breeching Inlets

- CE marking for underground and pillar fire hydrants
- BSI Kitemark

Portable Monitors

- BSI Kitemark

Fire Hose Reels

- Construction Products Regulation
- BSI Kitemark

Fire Hose Connectors

- BSI Kitemark

Fire Extinguishers

We offer a complete testing package including on-site witness testing and integrated multi-assessment visits.

- CE marking for the following Directives:
  Pressure Equipment Directive (PED)
  Marine Equipment Directive (MED)

- BSI Kitemark for major British and European standards covering specific characteristics, fire performance, test methods, assembly, construction and pressure resistance. Covering portable and mobile fire extinguishers, aerosol fire extinguishers and liquid fire-extinguishing media.

Fire Extinguishing Systems

Our BSI Kitemark certification covers the full Fire Extinguishing system rather than individual components although all the components and other associated equipment in the system must demonstrate conformity to relevant international Standards.

- BSI Kitemark to BS EN 15004-1 for the design and performance of the gas extinguishing system. This work is carried out either at the manufacturer's premises or at specialist test labs where the facilities comply with the Standard's fire performance requirements.

Fire Blankets

- BSI Kitemark

Fire Detection

Alarm systems

Control and indicating equipment, power supplies and fire extinguishing panels

We offer full compatibility testing of the system (control panel devices) and CE marking for:

- Construction Products Regulation
- Electro Magnetic Compatibility
- Low Voltage Directive
- Marine Equipment Directive

We also offer testing to the **Marine Agency requirements**

- BSI Kitemark

Line Units

- Construction Products Regulation (CPR)
- Electro Magnetic Compatibility (EMC)
- Low Voltage Directive (LVD)
- BSI Kitemark

Manual Call Points

- Construction Products Regulation (CPR)
- Electro Magnetic Compatibility (EMC)
- Low Voltage Directive (LVD)
- BSI Kitemark

Smoke and Heat Detectors

For multi criteria detectors combined testing can be undertaken

- Construction Products Regulation (CPR)
- Electro Magnetic Compatibility (EMC)
- Low Voltage Directive (LVD)
- BSI Kitemark

### Voice and Visual Alarms

- Construction Products Regulation (CPR)
- Electro Magnetic Compatibility (EMC)
- Low Voltage Directive (LVD)
- BSI Kitemark

Wireless Systems

- CE marking
- BSI Kitemark

System installation

Fire Alarm, Suppression and Emergency Lighting

- Certification is available for fire alarm systems, fixed fire fighting systems and for emergency lighting
- BAFE approval is available for design, installation and maintenance of these schemes
- BSI Kitemark

Emergency Lighting

- CE marking
- ENEC mark for emergency luminaires
- BSI Kitemark

Domestic alarms

Domestic Heat/Smoke/CO Alarms

- CE marking against the standards can be complemented by full compliance testing under:
- Electro Magnetic Compatibility (EMC)
- Low Voltage Directive (LVD)
- BSI Kitemark

Domestic Combination Alarms and Domestic Combustible Gas Alarms

For combination alarms, combined testing can be undertaken to the appropriate standards.

- BSI Kitemark

Smoke Alarms for the Deaf and Hard of Hearing

These take on a number of forms; visual with the use of a beacon, or tactile in the form of a vibrating pad or pillow, or both.

- BSI Kitemark

Transferring your certification to BSI

If you're looking to gain access to new markets and take advantage of our expertise, transferring your certification to BSI can reap real benefits.

Our certification managers, client managers, test engineers and business development managers have a thorough understanding of the testing and certification process

You'll be assessed by the most appropriately experienced professional, perfectly suited to your requirements

Transferring your existing certification to us is very straightforward – just 4 simple steps.

1 Contact us

Telephone or email us for a no-obligation review of your needs, and a written quotation. We operate with complete cost transparency for your peace of mind.

- **+44 (0)345 0765 606**
- **product.certification@bsigroup.com**

2 Apply

Send us your application together with:

- A copy of your current certificate and full scope
- Your latest assessment report*
- Your latest audit test report
- A copy of your type test report**
- We'll then send you a written quotation for your review

3 Receive your certificate from BSI.

4 Keep improving

We'll agree a programme of continuing assessment visits and audit testing to help you maintain your certification and continue to drive improvements for your business.

* if carried out by an accredited body and not more than 6 months old

** Your type test report should be preferably less than two years old. The work should be conducted by a reputable, accredited lab where we recognise the equivalence of the work they do matches with our own.

Additional services

We help manufacturers around the globe by supporting claims of compliance for new and innovative products. You can also use our multiple certification solutions to make sure you have the resilience to be able to cope with growth and be prepared for future challenges. Companies choose our services to protect their supply chain, their data and their operations.

Training from BSI experts

We offer one of the widest ranges of standards-related training available from quality management to managing your energy effectively. We don't just train you to meet standards – we help you to understand how to embed them into your organization.

We know what an auditor will look for – so we train you to meet it. We know the thinking behind the standard – so we can convey that to drive and inspire your people.

We have a team of expert tutors working across the world who can transfer the knowledge, skills and tools your people need to embed standards of excellence into your organization. They have vast amounts of training and assessment experience, and work across a wide range of business sectors.

Entropy™ software

Web based business improvement software solution that helps companies of all shapes and sizes in improving visibility, enhancing performance and driving business growth. Comprised of two core modules Compliance Management and Knowledge Management as well as a mini compliance module Action Management. They function either independently or as a whole to help companies maximise their effectiveness in the areas of internal inspections, non-conformity management, document control, training & competency, management reviews, legal register, customer complaints, supplier assessments and the corrective action process.
Benefits of the web based application include:

- Access 24/7 from anywhere with an internet connection.

- Single system visibility for staff and management, both locally and globally.

- Critical data at your fingertips. Being proactive than reactive.

- Reduce in time of chasing people up due to system automation, email notification and escalation.

- Streamlined efficient process where everyone is following the same way of doing things.

- Virtual extra member of staff where headcount and resource is at a premium.

About BSI

We are the business standards company that equips businesses with the right tools and solutions to turn best-practice standards into habits of excellence. With over 4,000 staff worldwide, we help our clients drive performance, manage risk and grow sustainably.

Founded in 1901 we were the world's first National Standards Body. Now over a century later, we're globally recognized as a champion in best practice. We have been and still are responsible for originating many of the world's most commonly used standards and publish nearly 2,700 standards every year. These standards are developed to address the most pressing issues of today. They also cover various industry sectors, including Aerospace, Automotive, Built Environment, Food, Healthcare, IT and Fire.

All our standards are underpinned by a collaborative and rigorous approach perfected over decades. We always work closely with industry experts, government bodies, trade associations, businesses of all sizes and consumers to develop standards that drive excellence.

We currently work with over 80,000 clients in 172 countries worldwide to help them adopt and cultivate continuous habits of best practice. We also train our clients and provide them with practical implementation guidance, as well as a comprehensive suite of compliance tools. And to ensure our clients get the very best service, we're also independently assessed and accredited globally by ANAB (ANSI-ASQ National Accreditation Board) and 26 other accreditation bodies throughout the world, including UKAS (United Kingdom Accreditation Service).

Our reach is global and we play a key role within the International Organization for Standardization (ISO). As one of the founding members, we help make sure international standards developed address today and tomorrow's business and social needs, while delivering real benefits to an organization and all its stakeholders.
