

Artificial Intelligence | ISO/IEC 42001:2023 Requirements

International Training

Number of days

1

Course descriptive

In today's fast paced environment, artificial intelligence is playing a greater role in both our personal and professional lives. AI can help position your place in the market, but there is a need to ensure this is done responsibly. Having an internationally recognized Artificial Intelligence Management System (AIMS) allows you to enhance organizational performance and gain a competitive edge when using AI.

Identify the structure and requirements of an effective AIMS and what this means for you. Gain a thorough understanding of the history and development of ISO 42001:2023, key terms, definitions and the ISO harmonized structure. You'll learn to interpret and apply the key concepts and principles of the standard to existing processes within your organization.

International Training **ISO/IEC 42001:2023 Requirements**

Agenda

Day 2

- | | |

International Training **ISO/IEC 42001:2023 Requirements**

Pedagogical objectives

This course will help you:

- Identify the key requirements and benefits of ISO 42001:2023
- Manage your requirements for AI systems and drive continual improvement
- Take steps to ensure that the AIMS is used as a core set of processes in your organization
- Attract and retain customers by meeting their current and future needs better

Skills to be acquired

Upon completion of this training, you will be able to:

- Explain the history and development of ISO 42001
- Describe what an AIMS is
- Identify the benefits of an AIMS
- Recognize the terms and definitions used
- Identify key concepts, principles and structure
- Identify the main requirements of ISO 42001

Public vis

Anyone involved in the implementation auditing, maintaining or supervising of an ISO 42001 AIMS

Pedagogical, technical and framing means

Course materials including :

- Introduction to the training, detailed program and security assignments
- Course presentation, theory and activities/ role plays
- Answers to the activities
- Videos
- Additional documents, distributed during the sessions, to use for the activities
- Attendance sheet to be signed

Assessment specifics

- Questionnaire to assess the knowledge at the end of the training
- Customer survey

What is included?

- Course materials, provided electronically
- Letter of attestation
- Official certificate

International Training **ISO/IEC 42001:2022 Requirements**

Prerequisites: There are no formal prerequisites, however it will be useful for delegates to read the standard before attending the course. An understanding of ISO 22989, Artificial Intelligence Concepts and Terminology would be beneficial.

*These training modules are eligible to the subsidizing by the public institutions in France (OPCO).

**Each delegate receives a training convention after the enrollment.

***Please note that for the public sessions, you have until 48h before the start of the course to confirm your enrollment. For the in-house sessions, the deadline would be of two weeks prior to the start of the course.

****Should you be in a disabled situation, please contact us and indicate what details should be taken into account.
